Jeddah, Saudi Arabia | +966 54 090 0962 | rawankhaledba@gmail.com | [LinkedIn Profile](#)

Professional Summary

Digital Experience Specialist with a strong focus on UI/UX design, combining analytical thinking with a creative, user-focused mindset to deliver impactful digital solutions. Experienced in translating complex business needs into clear, intuitive UI/UX layouts and data-driven platforms, while coordinating effectively with stakeholders and technical teams. Recognized as a fast learner, detail-oriented professional, and reliable team player who adapts quickly, leads with ownership, and consistently delivers high-quality outcomes in dynamic environments.

Professional Experience

Digital Experience & Ancillary Specialist, Saudi Airlines | April 2026 – Present

- Developed responsive web components from scratch using HTML and CSS to expand Sitecore capabilities, ensuring full compliance with the corporate Brand Identity.
- Designed and developed a custom MS Power Apps application, building user-friendly UI screens and forms that automate ready-to-use HTML/CSS code generation for content pages (e.g., Press Releases) through structured templates to avoid manual styling errors.
- Maintained strict visual consistency across the website by establishing reusable frontend patterns and unifying UI elements.
- Utilized Figma to design comprehensive wireframes and user interfaces, transforming conceptual requirements into high-fidelity UI/UX layouts before development.

Application Developer, ICAD (Contracted with Jeddah Airports) | January 2024 – March 2026

Website & Digital Platform Development

- Led business analysis activities, including gathering requirements, translating business needs into functional specifications, and aligning stakeholders across technical and non-technical teams.
- Designed and enhanced user interfaces for the Employee Internal Portal, King Abdulaziz International Airport (KAIA) website & mobile app, and internal Power Apps to improve user experience and operational efficiency.
- Optimized user journeys and digital experiences based on usability principles, stakeholder feedback, and benchmarking against industry best practices.
- Collaborated with vendors and cross-functional stakeholders to define features, integrations, and system enhancements aligned with business objectives.
- Managed and governed website content using Sitecore Experience Platform, ensuring accuracy, consistency, and compliance with content standards and stakeholder requirements.

Systems Integration & APIs

- Acted as a key focal point between business and technical teams for system integrations and API implementations.
- Supported integrations with CRM systems, enabling functionalities such as Contact Us, Lost & Found case creation, notifications, and case tracking.
- Coordinated API-based integrations for email services, flight data, and third-party systems, ensuring data accuracy and seamless user experience.
- Analyzed integration requirements, validated API responses, and worked closely with vendors to troubleshoot issues and ensure end-to-end data flow reliability.

Testing, Go-Live & Deployment

- Played a key role in pre-go-live readiness and deployment activities.
- Led and supported User Acceptance Testing (UAT), validating business requirements, documenting test scenarios, and ensuring alignment with expected outcomes.
- Coordinated end-to-end testing cycles, including functional, integration, and user experience testing.
- Tracked and managed defects using Jira, working closely with vendors to ensure timely resolution.
- Participated in go-live planning, execution, and post-launch monitoring, ensuring a smooth transition with minimal disruption.
- Identified usability gaps, pain points, and enhancement opportunities to improve navigation, accessibility, and overall platform performance.

Dashboard Development & Data Analytics

- Designed, developed, and optimized Power BI dashboards by integrating multiple data sources (Excel, SharePoint, and real-time data from SITA), ensuring accurate and actionable insights.
- Built scalable data models and implemented ETL processes to clean, transform, and structure raw data.
- Utilized Power Query (M) and DAX to automate reporting, enhance performance, and improve data reliability.
- Designed dashboard interfaces using Figma to ensure intuitive, user-friendly data visualization and improved user experience.

Project Execution & Management

- Maintained structured project documentation, ensuring alignment with business objectives and smooth execution across phases.
- Coordinated with vendors and internal teams, acting as a bridge between business stakeholders and technical teams.
- Led UAT sessions and conducted training workshops to ensure successful system adoption.
- Developed user manuals and documentation to support end-users in navigating and utilizing systems effectively.
- Collected and analyzed user feedback to drive continuous improvements and system enhancements.

UI/UX Designer (Internship), Jeddah Airports | August 2023 – December 2023

- Designed and modeled the user interface for the experimental mobile app for King Abdulaziz International Airport, covering initial and advanced design stages.
- Created the user interface for the internal employee portal to increase employee satisfaction.
- Collected business requirements and prepared Business Requirements Documents (BRD).
- Analyzed and designed dashboards using Power BI to support data-driven decision-making.

Projects

- **King Abdulaziz International Airport Website** | September 2024 – February 2026
A website targets both passengers and the public. Supporting Multiple features, including online services, maps, flight tracking, and customer care.
- **Web Portfolio** | May 2025 – August 2025 ([View Portfolio](#))
A personal web portfolio built with HTML, CSS, and JavaScript to showcase different projects, skills, and experience through a clean, responsive, and user-friendly design.
- **Employee Internal Portal** | August 2023 – October 2024
An interactive internal portal serves as a centralized employee services hub and enhances workplace engagement. Key features include personalized dashboards, access to company resources, organizational structure, and updates on news and events, all designed to support a more connected and informed workforce.
- **La La Land Airport Mobile App** | August 2023 – February 2024
A UI/UX-focused mobile app designed to enhance airport experience through intuitive navigation, live flight updates, terminal maps, and instant access to services for seamless, stress-free travel.
- **King Abdulaziz International Airport Mobile App (Beta Version)** | August 2023 – February 2024
A beta version of KAIA mobile app targets both passengers and the public. Offering flight tracking features, online services, and passenger frequently asked questions.

Education

Bachelor's in Management Information Systems, King Abdulaziz University | September 2019 – January 2024

- GPA: 4.51/5
- Graduated with Second Honors

Courses

- **Aviation Principles - Prince Sultan Aviation Academy** | April 2026 | 18 hours
- **Data Analyst in Power BI: Introduction to DAX in Power BI - Datacamp** | May 2025 | 3 hours
- **Data Analysis & Visualization with Microsoft Power BI - Ministry of Communications and Information Technology** | January 2024 | 16 hours
- **Agile Project Management & PMI-ACP Exam Preparation – Change Consulting Training** | January 2024 | 6 hours
- **Business Analysis Fundamentals: Business Process Modeling - LinkedIn Learning** | January 2024 | 1 hour
- **Power BI Data Analyst: Introduction to Power BI - Datacamp** | July 2023 | 12 hours
- **Introduction to User Experience Design - Google Developer Students Club** | February 2023 | 6 hours

Skills

Professional Skills: Process Optimization, System Analysis, Project Management, Data Analysis.

Technical Skills: UI/UX Design, Power BI, Figma, Microsoft Power Platform, Miro, JIRA, Sitecore, Microsoft CRM, ITSM (ServiceNow), MS Office, System Integrations.

Interpersonal Skills: Effective Presentation, Business Requirement Documentation (BRD), User Training, Stakeholder Communication, Creativity, Collaboration.

Achievements

- Certificate of Appreciation from the IT Director at Jeddah Airports for the efforts and commitment in enhancing and developing the IT and digital services in King Abdulaziz International Airport.
