

Rawan Baabdullah

Jeddah, Saudi Arabia | +966 540900962 | rawankhaledba@gmail.com | [LinkedIn Profile](#)

Professional Summary

Business Applications Specialist with a strong focus on business process optimization, UI/UX design, and data analysis. Excels in creating user-friendly interfaces, optimizing digital workflows, and developing dashboards that transform data into valuable insights for informed decision-making. Adapts seamlessly to dynamic environments, utilizing strong problem-solving skills while working independently or within cross-functional teams.

Professional Experience

Application Developer, Jeddah Airports | January 2024 – Present

Website & Digital Platform Development:

- Designed user interfaces for the **Employee Internal Portal**, **King Abdulaziz International Airport** website and mobile app, and **internal Power Apps** to enhance employee experience and operations, and optimized user journeys.
- Collaborated with vendors and stakeholders to define key features and industry best practices through benchmarking.
- Facilitated User Acceptance Testing (UAT) and provided training to ensure successful system adoption.
- Collaborated with the team in the pre-go-live testing, tracked bugs in JIRA, and worked with vendors for timely fixes while identifying pain points and enhancements to improve navigation, accessibility, and functionality.
- Managed website content using Sitecore CMS, ensuring consistency, accuracy, and alignment with stakeholder's requirements and content.

Dashboard Development & Data Analytics:

- Designed, developed, and optimized Power BI dashboards by integrating multiple data sources, such as Excel Sheets and SharePoint lists, building schemas, and ensuring seamless data connectivity for accurate, data-driven decision-making.
- Designed and implemented an **ETL (Extract, Transform, Load) process** to clean, transform, and structure raw data from multiple sources before analysis.
- Transformed and structured SharePoint list data using Power Query (M) and DAX, automating reports and enhancing performance through optimized data models and refresh cycles.
- Created dashboard layouts using Figma to visualize well-structured, user-friendly interfaces, enhancing the end-user experience and ensuring intuitive data presentation.

Project Execution & Management:

- Maintained comprehensive project documentation to ensure alignment with objectives and smooth project progression.
- Facilitated coordination with vendors and internal teams for timely and efficient execution.
- Collected business requirements and prepared Business Requirements Documents (BRD).
- Led User Acceptance Testing (UAT) and conducted training sessions to ensure effective use of the system.
- Developed detailed user manuals to guide end-users in utilizing IT business applications.
- Supported system enhancements by gathering user feedback and identifying areas for improvement.

UI/UX Designer (Internship), Jeddah Airports | August 2023 – December 2023

- Designed and modeled the user interface for the experimental mobile app for King Abdulaziz International Airport, covering initial and advanced design stages.
- Created the user interface for the internal employee portal to increase employee satisfaction.
- Collected business requirements and prepared Business Requirements Documents (BRD).
- Analyzed and designed dashboards using Power BI to support data-driven decision-making.

Projects

- King Abdulaziz International Airport Website** | September 2024 – Present
A website targets both passengers and the public. Supporting Multiple features including online services, maps, flight tracking, and customer care.
- Web Portfolio** | May 2025 – August 2025
A personal web portfolio built with HTML, CSS, and JavaScript to showcase different projects, skills, and experience through a clean, responsive, and user-friendly design.
- Reporting Application** | February 2025 – April 2025
A digital solution was developed using PowerApps and SharePoint to replace the manual process of documenting incidents and reporting the airport illegal drivers. The system streamlines data entry, enables real-time tracking, and enhances accuracy, accessibility, and compliance for the team and their supplier.
- Fleet Booking** | July 2024 – December 2024
An app designed to automate the car request service process for organization employees, covering request submission, approval workflows, and scheduling. The solution aims to improve operational efficiency, minimize manual errors, and ensure timely approval and dispatch of vehicles.
- Employee Internal Portal** | August 2023 – October 2024
An interactive internal portal serves as a centralized employee services hub and enhance workplace engagement. Key features include personalized dashboards, access to company resources, organizational structure, and updates on news and events, all designed to support a more connected and informed workforce.
- La La Land Airport Mobile App** | August 2023 – February 2024
A UI/UX-focused mobile app designed to enhance airport experience through intuitive navigation, live flight updates, terminal maps, and instant access to services for seamless, stress-free travel.
- King Abdulaziz International Airport Website and Mobile App (Beta Version)** | August 2023 – February 2024
A beta version of KAIA website and mobile app targets both passengers and the public. Offering the flight tracking features, online services, and passenger frequently asked questions.
